

## Gala / Mensa

The spacious tent can be used as a kitchen, storage, holiday or business/presentation purposes. The straight wall shape enables several tents to be connected together. The sides can be rolled out (from 1/3, from 2/3 or completely). Windows with mosquito net with a transparent cover flap and a cotton flap that can be closed with a zip fastener fully or partially. Vents in the gable enable regular air circulation. The roof is made of PVC coated polyester, side walls are of Airtex (extremely tear-resistant, mildew-resistant, washable, lightweight, climate-resistant and water-resistant).

**STROMEYER**

Gala and Mensa differ only in their colour scheme.
