

## Nepal Vario

Recreation tent in prefabricated construction. Extendible with 2 m long segments, each segment has a wire screen on bot sides with outer flap. Connections are made using loops/eyelet lock, above it covers straps. All side panels can be rolled up and there are 2 entrances. The gables can be opened fully or as entrance. The 440 g/m<sup>2</sup> thick material is characterised by high resistance to tears. The tent is designed to withstand decay, water pressure and is waterproof (water column 450 mm). Available in natural colour. The mud flap is made of coated polyester fabric.

**STROMEYER**
